

# AtheroRemo

 [consortiapedia.fastercures.org/consortia/ar/](http://consortiapedia.fastercures.org/consortia/ar/)

## Research Areas

**Basic Research**

## At a Glance

- Status: **Completed Consortium**
- Year Launched: **2009**
- Initiating Organization: **European Commission Sixth Framework Programme (FP6)**
- Initiator Type: **Government**
- Location: **Europe**

## Abstract

---

The AtheroRemo project has specifically been designed to target vulnerable plaques causing unexpected acute myocardial infarcts and sudden cardiac deaths.

## Sponsors & Partners

---

AtheroRemo will identify and validate novel drug targets as well as devise and validate diagnostic tests. It will also provide important knowledge for the development of strategies for prevention and clinical management of vascular diseases.
