Developing imaging technologies for therapeutic interventions in rare diseases (BIOIMAGE-NMD) - consortiapedia.fastcures.org

Abstract

The overarching objective of the BIOIMAGE-NMD project is to deliver combined structural and molecular imaging biomarkers with proven utility for the detection of therapeutic effects in patients with rare neuromuscular diseases (NMDs).

Mission

The project will have three specific objectives:

Financing

Funding is provided by the Seventh Framework Programme of the European Union.
Developing imaging technologies for therapeutic interventions in rare diseases (BIOIMAGE-NMD)
