European Clinical Research Infrastructures Network (ECRIN)

Research Areas

- **Tool Development**
  - Clinical Trial, Standard

- **Data-Sharing Enabler**

At a Glance

- **Status:** Active Consortium
- **Year Launched:** 2012
- **Initiating Organization:** European Commission Sixth Framework Programme (FP6)
- **Initiator Type:** Government

Abstract

The European Clinical Research Infrastructures Network (ECRIN) is focused on synergizing and connecting clinical research capabilities within the European continent.

Mission

ECRIN synergizes the capacities and capabilities of national clinical research to harmonize and connect these resources throughout the continent. It functions to support, provide services, coordinate, and manage high-quality, independent, and fully transparent multinational clinical research. By facilitating clinical research across Europe, ECRIN contributes to the achievement of the European Research Area and the “society of knowledge” and adds to European competitiveness.
