Abstract

The portfolio companies of Enlight Biosciences LLC develop and commercialize the next generation of potentially transformational platform technologies. Focused on innovative technologies for health, Enlight Biosciences is an entrepreneurial partnership with major companies and leading academics.

Mission

Enlight’s Health initiative is advancing patient-centric technologies and platforms that may impact all aspects of the connected health ecosystem from patient engagement and experience, to patient-focused research and development. Enlight provides a mechanism through which its strategic partners can collaboratively support the rapid and tailored development of these high-impact technologies.
