Hearing Industry Research Consortium

At a Glance

- Status: Active Consortium
- Year Launched: 2012
- Initiating Organization: IRC
- Initiator Type: Industry
- Location: International

Research Areas

- Product Development

Abstract

The purpose of the Hearing Industry Research Consortium is to develop and direct a noncompetitive, mutually agreed upon research agenda that benefits the hearing aid industry, its customers, and end users.

Mission

- Identify noncompetitive research topics, initiating requests for proposals in topic areas, and funding appropriate proposals

- Support educational Initiatives (e.g., research conferences)

- Coauthor research consortium position papers and conference presentations
