

# Promoting and Monitoring Biomedical Informatics in Europe (INBIOMEDvision)

 [consortiapedia.fastercures.org/consortia/inbiomedvision/](http://consortiapedia.fastercures.org/consortia/inbiomedvision/)

## Research Areas

### Tool Development

Data Sharing

### Data-Sharing Enabler

## At a Glance

- Status: **Completed Consortium**
- Year Launched: **2011**
- Initiating Organization: **European Commission Seventh Framework Programme (FP7)**
- Initiator Type: **Government**
- Location: **Europe**

## Abstract

INBIOMEDvision aims to become a European-wide initiative intended to monitor the evolution of the biomedical Informatics field and address its scientific challenges by means of collaborative efforts performed by a broad group of experts with complementary perspectives on the field.

## Mission

INBIOMEDvision's mission is as follows:

## Financing

INBIOMEDvision is funded by the European Commission under the Seventh Framework Programme under grant agreement no. 270107.
