Manchester Collaborative Centre for Inflammation Research

Research Areas

- Basic Research
- Data-Sharing Enabler

At a Glance

- Status: Active Consortium
- Year Launched: 2012
- Initiating Organization: University of Manchester
- Initiator Type: Academia
- Location: Europe

Abstract

The Manchester Collaborative Centre for Inflammation Research (MCCIR) was established to address current priorities in inflammatory disease in an open innovation, precompetitive collaboration between academia and the pharmaceutical industry.

Mission

MCCIR’s mission is to bring together clinical, industrial, and academic scientists – and innovate at this interface or in this unique interactive environment.

The following are MCCIR characteristics:

Consortium History

2012: MCCIR established
Financing

GlaxoSmithKline, AstraZeneca, and the University of Manchester have each invested £5 million.
