Abstract

NanoNextNL is a consortium of more than 100 companies, universities, knowledge institutes, and university medical centers, which is aimed at research into micro- and nanotechnology.

Mission

NanoNextNL aims to have achieved the following in 2016:

Financing

The total project cost for NanoNextNL is €250 million, half of which is contributed by the more than 100 businesses, universities, knowledge institutes, and university medical centers involved in the consortium and the other half by the Netherlands government.
