Abstract

The Pistoia Alliance is a global, nonprofit alliance of life science companies, vendors, publishers, and academic groups that work together to lower barriers to innovation in R&D. Its projects transform R&D innovation through pre-competitive collaboration. The alliance brings together the key constituents to identify the root causes that lead to R&D inefficiencies. They develop best practices and technology pilots to overcome common obstacles. Its members collaborate as equals on open projects that generate significant value for the worldwide life sciences community.

Sponsors & Partners

Established in 2009 by representatives of AstraZeneca, GlaxoSmithKline, Novartis, and Pfizer who met at a conference in Pistoia, Italy.
