## Research Areas

### Biomarker Research

Diagnostic

### Product Development

## At a Glance

- Status: **Active Consortium**
- Year Launched: **2008**
- Initiating Organization: **Center for Translational Molecular Medicine (CTMM)**
- Initiator Type: **Government**
- Location: **Europe**

## Abstract

---

## Mission

---

The PREDICcT consortium will combine the latest insights into the causes of Type 2 diabetes mellitus (DM2) with innovative technologies to identify risk-indicators (biomarkers) for DM2 and DM2-related complications, in order to enable (a) stratification of patients at risk of developing diabetes and its cardiovascular complications and (b) development of molecular diagnostics and molecular imaging to identify patients at risk.
